Blacktown Scrap Metal fuels NSW Late Models

NSW Late Models is pleased to announce that Blacktown Scrap Metal is getting right behind its 2011/12 efforts, providing one drum of methanol for each Round of the NSW Series held at Tyrepower Sydney Speedway.

Blacktown Scrap Metal principal Craig Champion is a big fan of Late Model racing, and keen to see the division soar.

All competitors on the night will be entered into a random draw, with the first two names drawn sharing the drum of fuel. The fuel is designed to be shared amongst all competitors across the season.

Bruce White from Speedway Spares will deliver the methanol to the track on behalf of Blacktown Scrap Metal.

Blacktown Scrap Metal pays cash for all types of scrap metal, and has a pickup service available.

NSW Late Models is very appreciative of the support shown by Blacktown Scrap Metal.

Round 1 of the NSW Late Model Series will be held at Tyrepower Sydney Speedway Saturday October 22.
